

The SAP Business One logo is displayed inside a white circle. It features the word "SAP" in a bold, black, sans-serif font, followed by "Business" in a smaller, lighter font, and "One" in a larger, bold, orange font.The Appseconnect logo features a white cloud icon with a circular arrow inside, followed by the text "APPS@CONNECT" in a white, sans-serif font.

APPS@CONNECT

SAP Business One & Shipworks Integration

www.appseconnect.com

Available Integration Touchpoints

Order Sync

- Add new orders to SAP B1 coming from Shipworks with specific details like bill to & ship to addresses, items, amount paid, tax amount, shipping amount, credit card details & the important feature is that it will also tell the store information from which the order came from.
- Updates the order which has already synced to SAP B1. Suppose after adding an order to SAP, you want to make some changes on that particular order like changing the item, delivery date or prices etc. The data from shipworks will automatically be changed to SAP B1 again.
- Suppose an order has been placed and it also added to the SAP B1, but now the order need to be pulled off or status needs to be changed. The order status update gets automatically the changed orders in SAP B1 and updates its status to shipworks.

Shipment Sync

- Update the order shipment information coming from SAP B1 to Shipworks. Let's say the order generates a tracking id and needs to be updated along with Shipping cost, processing dates etc., this can be done automatically.

Seamless integration between your apps

Automate manual processes

APPSeCONNECT makes life easier for you. Seamlessly connect all your business applications and save time by automating manual processes.

Focus on Profitability

Why spend hours in doing manual work that can be automated. Instead, focus on your core business and increase your revenue.

What our customers say...

For us, the **“set it and forget it”** aspect of the APPSeCONNECT is the best part. We needed something that could run on its own and just work, APPSeCONNECT does this quite well.

Terence McDevitt

Project Manager
Premier Research Labs
