

Netsuite and Magento integration

www.appseconnect.com

Available Integration Touchpoints

Customer Sync

➔ New Customer

New customer's account, contact information, billing and shipping address etc. will be synchronized to NetSuite.

➔ Existing Customer

Existing web customer's details are downloaded to NetSuite automatically in real time.

Item Sync

➔ Item sync from NetSuite to Magento

Enlist NetSuite items in the Magento web store with all details. Updates made in NetSuite will also be synced to Magento.

➔ Real-time stock update

Real-time stock update from NetSuite to maintain exact inventory level in the eCommerce store.

➔ Netsuite warehouses mapped with Magento

Netsuite warehouses can be fully mapped with the Magento websites. Inventory from a desired location or a cumulative stock from multiple warehouses can be synced to Magento.

➔ **Product download and update**

Download existing products to NetSuite from Magento. Update in product details on Magento can be instantly reflected in NetSuite Item.

Order Sync

➔ **Web customers**

All the Magento sales orders placed by the web customers will instantly be converted into NetSuite Sales Orders.

➔ **Guest customers**

All the web sales orders placed by the guest customers on Magento will also be transformed into NetSuite Sales Orders.

➔ **Web orders**

Web Orders can be synced back to NetSuite with status – Pending Approval, providing an opportunity to NetSuite User for an order approval process, checking payment, stock and even customer validation process. Alternatively, APPSeCONNECT can directly create an order with status – Approved.

➔ **Delivery status**

Once delivery or Invoice is generated in NetSuite, web users can instantly get the updated information and shipment tracking number on Magento by viewing the web order status, which will be changed from 'pending/processing' to "shipped" and "complete".

➔ **Partial Delivery**

Partial shipment will be created in Magento in case of partial delivery in NetSuite.

➔ **Value mapping of tax and shipping charges**

Exact value mapping of tax and shipping charges are ensured for proper order total calculation while converting web orders into NetSuite sales orders.

➔ **Discounts sync**

APPSeCONNECT fully supports synchronization of discounts to NetSuite Sales Order and maintains same order value both in Magento and the ERP system.

Shipment Sync

➔ **Shipping method and charges**

eCommerce shipping method and shipment charges will be fully mapped with NetSuite Shipping methods, through APPSeCONNECT.

➔ **Shipment tracking**

NetSuite user can put the shipment tracking number in NetSuite delivery document and it will be synced to Magento. This tracking number is available in the storefront in the order details. Thus, web customer can track his/her shipments using this tracking number.

Some unique features

➤ **Multilingual and Multicurrency Support**

APPSeCONNECT is fully able to cater product descriptions in multiple languages and perform an automatic currency conversion in between the sync process.

➤ **Support for multiple websites**

APPSeCONNECT has the full capability to connect multiple websites with NetSuite.

Seamless integration between your apps

Automate manual processes

APPSeCONNECT makes life easier for you. Seamlessly connect all your business applications and save time by automating manual processes.

Focus on Profitability

Why spend hours in doing manual work that can be automated. Instead, focus on your core business and increase your revenue.

What our customers say...

For us, the **“set it and forget it”** aspect of the APPSeCONNECT is the best part. We needed something that could run on its own and just work, APPSeCONNECT does this quite well.
