APPSeCONNECT

Sage 300 &
Woocommerce Integration

Available Integration Touchpoints

Customer Sync

- Web customers register online in WordPress WooCommerce website will be synced back to SAGE 300 ERP along with customer details which includes their billing and shipping addresses, contact information under customer section.

- Customer sync works bi-directionally. Existing customer details can be sync back and forth to WooCommerce.

Product Sync

- ERP Items can be listed in WooCommerce, while existing item details defined in WooCommerce will be synced back to SAGE 300 under Inventory Control Item list.

- Item sync works bidirectionally between WooCommerce and Sage 300 works bidirectionally.

Inventory Sync

- Stock Updates which happen in SAGE 300 through Purchase Cycle or Inventory Adjustment Process will be synced back to WooCommerce website.

- Warehouses can be fully mapped with the WooCommerce websites. Inventory from a desired warehouse or cumulative stock from multiple warehouses can be synced to WooCommerce through configuration in APPSeCONNECT Dynamic Mapping Interface.

Order Sync

- Web orders placed in Shopify will be synced to SAGE 300 as a Sales Order or Order Entry.

- Taxes and Shipping Charges will be properly mapped in between eCommerce and ERP.

- Even Sales Orders by our guest customers can be synced to SAGE 300 and the sales orders also can be assigned against a Default Customer for Order Processing.

Order Fulfilment

- Shipments can be created in SAGE 300 against every sales order which will be synced back to WooCommerce and reflects the delivery status as completed.

- Once delivery document is created in Sage, payment can be synced from Sage 300 ERP to WooCommerce and the status has been updated as Paid.

- APPSeCONNECT supports mapping of Online and offline Payment method both, based on the business requirements the entire process can be configured.
