Available Integration Touchpoints

Customer Sync

- Web customers register online in Magento website will be synced back to SAGE 300 ERP along with customer details which includes billing and shipping details, contact information under customer section.
- Customer sync works bi-directionally. Existing customer details can be sync back and forth to Magento.

Product Sync

- ERP Items can be listed in Magento while existing item details defined in Magento will be synced back to SAGE 300 under Inventory Control Item list.
- Item sync occurs between Magento and Sage 300 bidirectionally.

Inventory Sync

- Stock Updates which happen in SAGE 300 through Purchase Cycle or Inventory Adjustment Process will be synced back to Magento website.
- Warehouses can be fully mapped with the Magento websites. Inventory from a desired warehouse or cumulative stock from multiple warehouses can be synced to Magento through configuration in APPSeCONNECT Dynamic Mapping Interface.

Order Sync

- Web orders placed in Magento will be synced to SAGE 300 as a Sales Order under Order Entry section.
- Taxes and Shipping Charges will be properly mapped in between Magento and Sage 300 ERP.
- Even Sales Orders by our guest customers can be synced to SAGE 300 which will assign against a Default Customer Code for Order Processing.

Seamless integration between your apps

Automate manual processes

What our customers say...

For us, the **“set it and forget it”** aspect of the APPSeCONNECT is the best part. We needed something that could run on its own and just work, APPSeCONNECT does this quite well.
