

Microsoft Dynamics NAV & Magento Integration

www.appseconnect.com

Available Integration Touchpoints

Customer Sync

➔ New Customer

New customer's account, contact information, billing and shipping address etc. will be synchronized to Microsoft Dynamics NAV Business Partner Master Data.

➔ Existing Customer

Existing web customer's details are downloaded to Microsoft Dynamics NAV automatically in real time.

➔ Guest Customer

As per business requirement, the connector can be configured to sync the guest customer's information such as contact and address, to Microsoft Dynamics NAV with a different B.P Code for easy tracking. Merchants can plan for further marketing activity for these guest customers based on their contact information.

Item Sync

➔ List Items in different categories

List Microsoft Dynamics NAV items in the e-commerce web store as simple, configurable, bundled, grouped, downloadable and even virtual type of products.

➤ **Attach multiple images to an item**

NAV User can attach multiple images along with an item before uploading it to Magento e-commerce web store.

➤ **Maintain different pricelists in different websites**

The ability to attach Microsoft Dynamics NAV pricelists with Magento websites allows an Item to have different prices in different websites based on the Microsoft Dynamics NAV pricelist.

➤ **Group-wise pricing**

Multiple customer groups defined in Magento can be associated with its corresponding Microsoft Dynamics NAV price lists to facilitate Customer group wise pricing in Magento.

➤ **Maintain exact inventory level**

Real-time Stock Update from Microsoft Dynamics NAV to maintain exact inventory level in the eCommerce store. APPSeCONNECT can be configured to support different levels of Inventory sync as per requirement, it supports In Stock-Committed+Ordered Inventory or In Stock-Committed Inventory Levels.

➤ **Period and volume discounts**

Period and volume discounts on items can be set from NAV and it will be reflected in the web store.

➤ **Easy download of products**

Download existing simple, configurable, grouped, bundled and virtual type web products to Microsoft Dynamics NAV in just one click.

➔ **Product details update**

Updation made in product details on Magento can be instantly made to reflect in Microsoft Dynamics NAV Item Master Data.

Order Sync

➔ **Sales order sync – Web customers**

All the Magento sales orders placed by the web customer will instantly be converted into Microsoft Dynamics NAV Sales Orders.

➔ **Sales order sync – Guest customers**

All the web sales orders placed by the guest customers will be transformed into Microsoft Dynamics NAV Sales Orders.

➔ **Order Approval process**

Web Orders can be synced back to Microsoft Dynamics NAV as sales orders, providing an opportunity to Microsoft Dynamics NAV users for an order approval process, checking payment, stock and even customer validation. With APPSeCONNECT, Business Owners can even choose which web orders will sync back to Microsoft Dynamics NAV through a dynamic mapping screen.

➔ **Payment method sync**

APPSeCONNECT will sync back payment method from Magento to Microsoft Dynamics NAV in sales. In case of online payment, transaction ID will be synced back to Microsoft Dynamics NAV sales order along with payment mode (PayPal/Authorize.Net, etc.) providing an option to Microsoft Dynamics NAV users to charge the corresponding payment gateway website/provider.

+ **Web order status update**

Once delivery invoice or A/R invoice is generated in NAV, web users can instantly get the updated information and shipment tracking number on Magento by viewing the web order status which will be changed from 'pending/processing' to 'shipped/complete'.

+ **Order total calculation**

Exact value mapping of tax and shipping charges are ensured for proper order total calculation while converting web orders into Microsoft Dynamics NAV sales orders.

+ **Maintain same order value**

APPSeCONNECT fully supports synchronization of the discounts to Microsoft Dynamics NAV sales order and maintains the same order value both in Magento and ERP systems.

Payment Sync

+ **Payment Gateway**

The Magento store being integrated with a payment gateway, payment authorization and capture process will happen in the gateway website. On successful payment, the transaction ID will be returned and the order will get placed on Magento. Also the invoice will be instantly generated in eCommerce store. APPSeCONNECT will download the sales order, invoice to Microsoft Dynamics NAV as ERP sales order and A/R reserve invoice with incoming payment along with the online payment transaction ID.

+ **Payment method details**

In case capture process is required to be done after delivery dispatch. After the payment authorization we can download the payment method details as incoming payment in Microsoft Dynamics NAV with the transaction ID.

➔ Credit Card Saved

If the Magento store is PCI – PA DSS compliant and if you are saving the credit card information in the eCommerce website, APPSeCONNECT can download these information to Microsoft Dynamics NAV through sales order, A/R reserve invoice associated with an incoming payment which mentions the credit card Information, so that you can charge the credit card. Your NAV server will also need to be PCI compliant.

Shipment Sync

➔ Shipping method and Shipment charges

eCommerce shipping method and shipment charges will be fully mapped with Microsoft Dynamics NAV shipping method and freight, through APPSeCONNECT.

➔ Shipment tracking number

NAV Business One user can put the shipment tracking no. in NAV Delivery Note and it will be synced to Magento. This tracking number is available in the storefront in the order details. Thus web customer can track his/her shipments using this tracking number.

➔ Support for multiple websites

APPSeCONNECT has the full capability to connect multiple websites with Dynamics NAV.

➔ Automatic synchronization

Fully Automated Synchronization at defined time interval is available with option for manual trigger as well.

Seamless integration between your apps

Automate manual processes

APPSeCONNECT makes life easier for you. Seamlessly connect all your business applications and save time by automating manual processes.

Focus on Profitability

Why spend hours in doing manual work that can be automated. Instead, focus on your core business and increase your revenue.

What our customers say...

For us, the **“set it and forget it”** aspect of the APPSeCONNECT is the best part. We needed something that could run on its own and just work, APPSeCONNECT does this quite well.
