APPS℮CONNECT

WooCommerce and Microsoft Dynamics GP Integration

Available Integration Touchpoints

Customer Sync

- Web customers can register online. All the registration information like customer information, email, phone number, billing & shipping address, etc. will be synchronized from WooCommerce to Microsoft Dynamics GP Customer Card.

- Any existing web customer information in WooCommerce will be updated in real-time to Dynamics GP.

- As per business requirements, the connector can be configured to sync guest customer information such as contact and address information, to Dynamics GP with a different Item Card Code for easy tracking; merchants can plan further marketing activity to these guest customers based on their contact info.

- As we support bidirectional sync, customer can be synced from Dynamics GP to WooCommerce also.

Item and Inventory Sync

- Enlist Dynamics GP items in the WooCommerce web store with all details.

- Dynamics GP warehouses can be fully mapped with the WooCommerce website. Inventory from the desired warehouse or a cumulative stock from multiple warehouses can be synced to WooCommerce through configuration in APPSeCONNECT's Dynamic Mapping Interface.

- Download existing simple or variant products from WooCommerce to Dynamic GP in just one click.

- Real-time stock update from Dynamics GP to maintain the exact inventory level in the WooCommerce store. Product stock will be synced from Dynamics GP to WooCommerce, and there are options to choose multiple variants of combinations.

Sales Order Sync

- All the WooCommerce sales orders placed by the web customers will instantly be converted into Microsoft Dynamics GP Sales Orders.

- All the web sales orders placed by the guest customers will also be transformed into Microsoft Dynamics GP Sales Orders.

- Web Orders can be synced back to Dynamics GP as Sales Order, providing an opportunity to the Dynamics GP user for order processing, checking payments, stock and even customer validation process. With APPSeCONNECT, business owners can even choose which web orders will sync back to Dynamics GP through a Dynamic Mapping screen.

Fullfilment Sync

- Shipments can be created in Dynamics GP against every sales order which will be synced back to WooCommerce and reflects the delivery status as completed.

- Payment and finance figures can be reflected in Microsoft Dynamics GP in a real-time base. APPSeCONNECT supports the mapping of online and offline payment methods – both based on business requirements. The entire process can be configured.

Start FREE Trial

- APPSeCONNECT supports the mapping of online and offline payment methods – both based on business requirements. The entire process can be configured.

- Microsoft Dynamics GP user can put the shipment tracking number in the delivery note and it will be synced to WooCommerce.

Seamless integration between your apps

Automate manual processes

APPSeCONNECT makes life easier for you. Seamlessly connect all your business applications and save time by automating manual processes.

Focus on Profitability

Why spend hours in doing manual work that can be automated. Instead, focus on your core business and increase your revenue.

What our customers say...

For us, the **"set it and forget it"** aspect of the APPSeCONNECT is the best part. We needed something that could run on its own and just work, APPSeCONNECT does this quite well.
