SAP Business One and PrestaShop Integration

Synchronization Points

Customer

- Web customers can register online. All registration information like account information, contact information, billing & shipping address, etc. will be synced to SAP Business One Business Partner Master Data.

- Any existing web customer details can be downloaded to SAP Business One automatically.

- As per the business requirements, the connector can be configured to sync Guest Customer information such as contact and address information to SAP Business One. With a different B.P. code for easy tracking, merchants can plan further marketing activity to these Guest Customers based on their contact info.

Order

- All the PrestaShop sales orders placed by the web customer will instantly be converted into SAP Business One Sales Orders.

- All the web sales orders placed by the guest customers will also be transformed into SAP Business One Sales Orders.

- Web Orders can be synced back to SAP Business One as Draft Sales Order, providing an opportunity to SAP Business One user for an Order Approval Process, checking payment, stock and even customer validation process. With APPSeCONNECT, business owners can even choose which Web Orders will sync back to SAP Business One through a Dynamic Mapping screen.

- APPSeCONNECT will sync back Payment Method from PrestaShop to SAP Business One in Sales. In the case of Online Payment, Online Payment Transaction ID will be synced back to SAP Business One Sales Order along with Payment Mode (PayPal/Authorize.Net, etc.) providing an option to SAP Business One user to charge the corresponding payment gateway Website/provider.

- On successful payment, an A/R Invoice will be generated in SAP Business One.

- Exact Value Mapping of Tax and Shipping Charges are ensured for proper Order Total calculation while converting web orders into SAP Business Sales Orders.

- APPSeCONNECT fully supports the sync of these discounts to SAP Business One Sales Order and maintains the same order value both in PrestaShop and ERP systems.

Synchronization Points

Product

- List SAP Business One items in the PrestaShop web store.

- Stock Update from SAP Business One to maintain the exact inventory level in PrestaShop. APPSeCONNECT can be configured to support different levels of Inventory sync as per requirement – it supports In Stock-Committed + Ordered Inventory or In Stock-Committed Inventory Levels.

- SAP Business One warehouses can be fully mapped with the PrestaShop websites. The mapping of one warehouse to one website is fully possible through APPSeCONNECT Dynamic Mapping Interface.

- Updates made in product details on SAP Business One can be instantly made to be reflected in PrestaShop.

Payment

- **Payment Gateway**
  The PrestaShop store is integrated with a payment gateway, payment authorization and capture process will happen in the gateway website. On successful payment, the transaction ID will be returned, and the order will get placed on PrestaShop. Also, the invoice will be instantly generated in PrestaShop. APPSeCONNECT will download the sales order, invoice to SAP Business One as ERP sales order and A/R reserve invoice with incoming payment along with the online payment transaction ID.

- **Payment method details**
  In some cases, the capture process is required to be done after delivery dispatch. After the payment authorization, we can download the payment method details as incoming payment in SAP Business One with the transaction ID.

- **Credit Card Saved**
  If the PrestaShop store is PCI – PA DSS compliant and if you are saving the credit card information in the eCommerce website, APPSeCONNECT can download this information to SAP Business One through sales order, A/R reserve invoice associated with an incoming payment which mentions the credit card information, so that you can charge the credit card. Your SAP Business One server will also need to be PCI compliant.

Synchronization Points

Some unique features:

- Multilingual and Multicurrency Support
  APPSeCONNECT is fully able to cater to product descriptions in multiple languages and perform automatic currency conversion between the sync process if PrestaShop API permits.

- Support for multiple websites
  APPSeCONNECT has the full capability to connect multiple PrestaShop websites with SAP Business One

What our customers say...

PRANA ORGANIC

Without APPSeCONNECT, I don't think we could have grown our website to where it is now. In terms of what is out there in the market, it is the cheapest option that would deliver a reliable service.
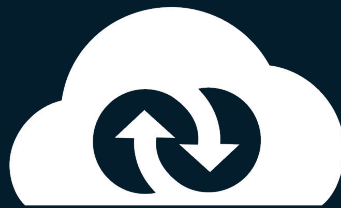

Erika Weihmayer
Prana Biovegan

LUMI NOX Luminox
SWISS MADE

The product is easy to work with. Throughout the process, APPSeCONNECT was very accommodating of our specific requests.

Victoria Schweistein
