APPSeCONNECT

SAP Business One and ShipStation Integration

Synchronization Points

Customer

Add Customer
Add new customers to SAP Business One from ShipStation with specific details like name, addresses, billing and shipping addresses, customer code etc.

Update Customer
Suppose after adding a customer to SAP Business One, some customer details have been altered and these changes will be updated in SAP Business One also via APPSeCONNECT.

Product

Add Product
Add new products to SAP Business One from ShipStation with specific details like SKU, weight, item cost, price, dimension, tariff code, country of origin and description of that product.

Update Product
Updates the product which has already synced to SAP Business One. Suppose after adding a product, certain changes are required in ShipStation, and these changes are also needed in SAP Business One, then APPSeCONNECT will automatically update the changed fields in SAP Business One.

Order

Add Order
Add new ShipStation orders to SAP Business One Sales Orders with specific details like Bill To and Ship To addresses, Items, Amount Paid, Tax Amount, Shipping Amount.

Update Order
Updates the Order which has already synced to SAP Business One. Suppose after adding an order to SAP Business One, you want to make some changes on that particular order like changing the item, delivery date or prices etc, it can be easily accomplished.

Update Order Status
Suppose an order has been placed and it has been synced to SAP Business One, but now the order needs to be pulled off. So, if Order is cancelled in ShipStation, the corresponding order gets automatically cancelled in SAP Business One by APPSeCONNECT

Synchronization Points

Shipment

Add Shipment

Once labels are created in ShipStation, APPSeCONNECT will sync them as Delivery Document against their corresponding orders in SAP Business One. The ShipStation tracking information and shipping status is also updated in SAP Business One.
