

SAP Business One and ShipWorks Integration

SAP BUSINESS ONE AND SHIPWORKS INTEGRATION

Synchronization Points

Order

- Add new orders to SAP Business One coming from ShipWorks with specific details like bill to & ship to addresses, items, amount paid, tax amount, shipping amount, credit card details & the important feature is that it will also tell the store information from which the order came from.
- Updates the order which has already synced to SAP Business One. Suppose after adding an order to SAP Business One, you want to make some changes on that particular order like changing the item, delivery date or prices etc. The data from ShipWorks will automatically be changed to SAP Business One again.
- Suppose an order has been placed and it also added to the SAP Business One, but now the order need to be pulled off or status needs to be changed. The order status update gets automatically the changed orders in SAP Business One and updates its status to ShipWorks.

Shipment

- Update the order shipment information coming from SAP Business One to ShipWorks. Let's say the order generates a tracking id and needs to be updated along with Shipping cost, processing dates etc., this can be done automatically.
