

CUSTOMER STORY

NINE LINE APPAREL

Nine Line Apparel has optimized and improved their overall business processes including efficient order fulfillment and higher customer satisfaction levels.

About Nine Line Apparel

Nine Line Apparel was founded in 2012 by two army veteran brothers to provide the quality apparel to patriotic Americans. As a lifestyle brand, Nine Line Apparel aims to reinvigorate the sense of patriotism and national pride. Their goal has been to bridge the gap between military and civilians. In the past few years, their brand has grown, and they have decided to give back to the community they once served.

On The Road to Success

Nine Line Apparel was quickly gaining popularity across the market and even got endorsed by the WWE legend, Mark Calaway, aka the "Undertaker." Nine Line Apparel, that started out as a small venture between a military veteran and his wife in 2012, soon outgrew its storefront. They took their business online to cater to their growing scale of business. BigCommerce was their choice of eCommerce platform to operate their online storefront, Shipstation for streamlining the order fulfillment process and finally SAP Business One HANA to manage their back-end business operations. While all three applications operated successfully as isolated systems, Nine Line Apparel needed a robust and responsive integration solutions to connect SAP Business One HANA with BigCommerce as well as ShipStation to achieve end-to-end automation and accelerate their business growth

Facing Down the Challenges

Nine Line Apparel was facing major setbacks towards creating a streamlined business due to the lack of proper integration between the business applications. There were many technical challenges such as HEXCode required for shipment via ShipStation could not be generated, data access bottlenecks per API call for ShipStation, manual adjustment of coupon codes generated in BigCommerce for SAP Business One HANA, slow inventory sync between BigCommerce and SAP and many more. That is when APPSeCONNECT came in as a game changer for Nine Line Apparel.

Headquarters:

Savannah, Georgia

Industry:

Fashion & Lifestyle

Company Size:

100-200 employees

The team over at APPSeCONNECT was very pleasant to work with and was able to integrate our B1 Build to our Shipstation platform. The APPSeCONNECT team was very quick to respond to changes in direction and always handled these changes as a priority. They were able to handle multiple touch points across all aspects of our ERP and was able to recommend best practice during our implementation and integration.

The SAP Business One HANA + BigCommerce and SAP Business One + ShipStation Connector by APPSeCONNECT

Manually managing massive bulks of data from three different applications brought on multiple hurdles towards fast and flexible workflows. APPSeCONNECT as a next-gen robust low-code Business Process Automation and integration platform provided a seamless integration for SAP Business One HANA, BigCommerce and ShipStation. The smart and intelligent integration provided was the ideal solution for Nine Line Apparel to seamlessly synchronize data for BigCommerce and ShipStation with SAP Business One HANA. The **SAP Business One HANA + BigCommerce and SAP Business One + ShipStation** integration by APPSeCONNECT delivered a reliable integration with real-time bidirectional data sync across the entire software ecosystem. The pre-configured connector worked right out-of-the-box, saving both time and resources for Nine Line Apparel to deploy the required integration. By working with APPSeCONNECT, they also got to work with ProcessFlow, the intuitive Visual Integration Builder, that helped them customize the integration to meet their specific needs effortlessly.

The PowerUp of Integration

With the boost in operational efficiency and productivity received by the power of APPSeCONNECT's robust integrations, Nine Line Apparel was able to effortlessly synchronize all their business-critical data through a single platform. The APPSeCONNECT Team also worked diligently to rapidly deploy a solution that works right out-of-the-box. According to Robert Donnelly, NineLine Apparel, "The team over at APPSeCONNECT was very pleasant to work with and was able to integrate our SAP Business One Build to our Shipstation platform. The APPSeCONNECT team was very quick to respond to changes in direction and always handled these changes as a priority."

The packaged integration solution offered to Nine Line Apparel by APPSeCONNECT offered the following advantages:

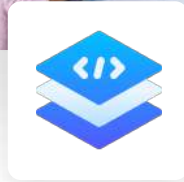

- Pushed all orders from BigCommerce to Shipstation to generate HEXCode.
- Synchronized all orders with respective HEXCode from ShipStation to SAP Business One HANA and produced the tracking id.
- Increased request limit of each API call for ShipStation enabled ready access and transfer of all data efficiently.
- Managed BigCommerce coupon codes synchronized as Line Items in SAP HANA on a document level and adjusted in-total at the end.
- Faster, and more efficient inventory update and synchronization.
- Efficient and smart connectors enabled the same ID to exist for items across all three platforms so that "No Records Found" scenarios do not interrupt the order fulfillment cycle.
- Effortless customer data synchronize into SAP Business One using the same input for fetching AR down-payment and incoming payment and removed the need for multiple requests to SAP Business One HANA.
- Customer details subsequently added as details of Business Partner in SAP Business One HANA.
- Enabled unfulfilled orders from previous orders to be automatically created as new orders and lined up into ShipStation.

The Integration Game Changer

Through the robust SAP Business One HANA + BigCommerce and SAP Business One + ShipStation integration by APPSeCONNECT, Nine Line Apparel has now established themselves as a leading online fashion brand, achieving unprecedented levels of success. They thank APPSeCONNECT for making this endeavor possible and providing an integration journey as smooth as this. With APPSeCONNECT's robust integration Nine Line Apparel was able to achieve the following benefits:

- Readily access to inventory items data and synchronization between BigCommerce and SAP Business One.
- Increased performance with only 0.1% of no matching records for Business Partners
- 90% success rate with workflow for fetching customer details from orders in SAP Business One HANA.
- 1500+ orders synchronized efficiently every day into SAP Business One HANA.
- Improved customer satisfaction and order fulfillment levels.
- Time and resources saved with efficient real-time data exchange.
- Elimination of manual data entry and reduced data duplication.
- Streamlined business operations and enabled perpetual growth.

Here's How APPSeCONNECT is Your Best Fit Too!

- Next-gen low-code/ no-code iPaaS for effortless automation and integration
- Robust user-friendly platform backed by experienced professionals
- Best in class implementation and post-implementation customer support
- Pre-Built Connectors with industry-tested reliability and functionalities
- Built-in functionalities to support geographical expansion
- Deeper full-stack integration for unparalleled scalability and customizability
- Fully automated instant bi-directional data sync
- Flexible implementations that scale with a growing eCommerce business
- Boost efficiency of business processes and team productivity

Connect Your Applications Under One Platform and Automate Business Processes
